Portfolio

+2349134248820

Summary of Qualifications

Dedicated and efficient full stack developer with 3+ years' experience in application layers, presentation layers, and databases. Certified in both Front/End and Back/End technologies. An astute learner seeking to further improve in further Web skills and framework technologies as future stack development comes into relevance.

Experience

Full Stack Developer

Till Now–June 2021

Technokraft Web Solutions

Key Qualifications & Responsibilities

- Developed full-stack web applications which processed, analyzed, and rendered data visually.
- Spearheaded and liaised with back-end developers, front-end developers, designers, quality assurance testers, and CTO as needed for the creation of responsive and functional web applications.
- Managed time-sensitive updates to web applications, including content changes and database upgrades.
- Planned, wrote, and debugged web applications and software with complete accuracy.
- Setup and Deployment of web application on web server hosting platforms and on cloud platforms such as Heroku and AWS (SSL site security) inclusive.

Key Achievements

Spearheading successful Integration of both Front-end stacks and Back-end stacks, thereby combining expertise experience increasing productivity by 40%, reducing latency by 20% and increasing database admin effectiveness by 20%.

Junior Full Stack Developer
January 2018–December 2020
Digibrand

Key Qualifications & Responsibilities

- Maximized applications' efficiency, data quality, scope, operability, and flexibility.
- Used various ideas from distributed computing, large-scale design, real-time data processing, data storage, ML, and AI to solve challenging dataset problems.
- Managed, optimized, and updated MongoDB databases as necessary and for use in user authentication for web applications.
- Developed app integration with REST / SOAP and other APIs for Google Maps, social media logins, payment processors, and other services.
- Development of a Real time chat Web application using Socket io as transport connection and Node js as backend.
- Built an ecommerce web app to sell products online. Increased company sales by 58%.
- Developed Single Page React restaurant web application based completely off on React JS.
- Built a Bitcoin/Crypto Sales and Conversion to Fiat Currency Website with data fetched from Coingecko API in real time and email notifications.
- Development of Hospital Management System for Medical staff and patient data storage for a local private hospital. Increased patient satisfaction scores by 30%.
- Development of Web Application with NFT Cards for decentralized finance crypto trading platform which its details are stored on a cloud database and can be dynamically changed and managed by the authorized administrative role assigned using React Framework and Node Technology.
- Development and Integration of web3 Wallet connect authentication for Ethereum Blockchain transactions.

Education

Higher National Diploma

Moshood Abiola Polytechnic, Abeokuta

Graduation: 2020

Relevant Coursework: Operating Systems Architecture, C# Programming, Usability in Technologies and Software Design, Relational Database Design & SQL, Computer Engineering

Certifications

Front-End Web Development with React

December 2021 to Present

A Certification on Coursera from the University of Science and Technology Hong Kong for successful completion on React Course.
